öKlo LoBu

Description

As a cost-effective alternative to the öKlo Klassik, the LoBu is in no way inferior to its larger counterpart. It is also **odor-free, regionally manufactured, chemical-free**, and ideal for gardens, cellar alleys, sports fields, playgrounds, and more.

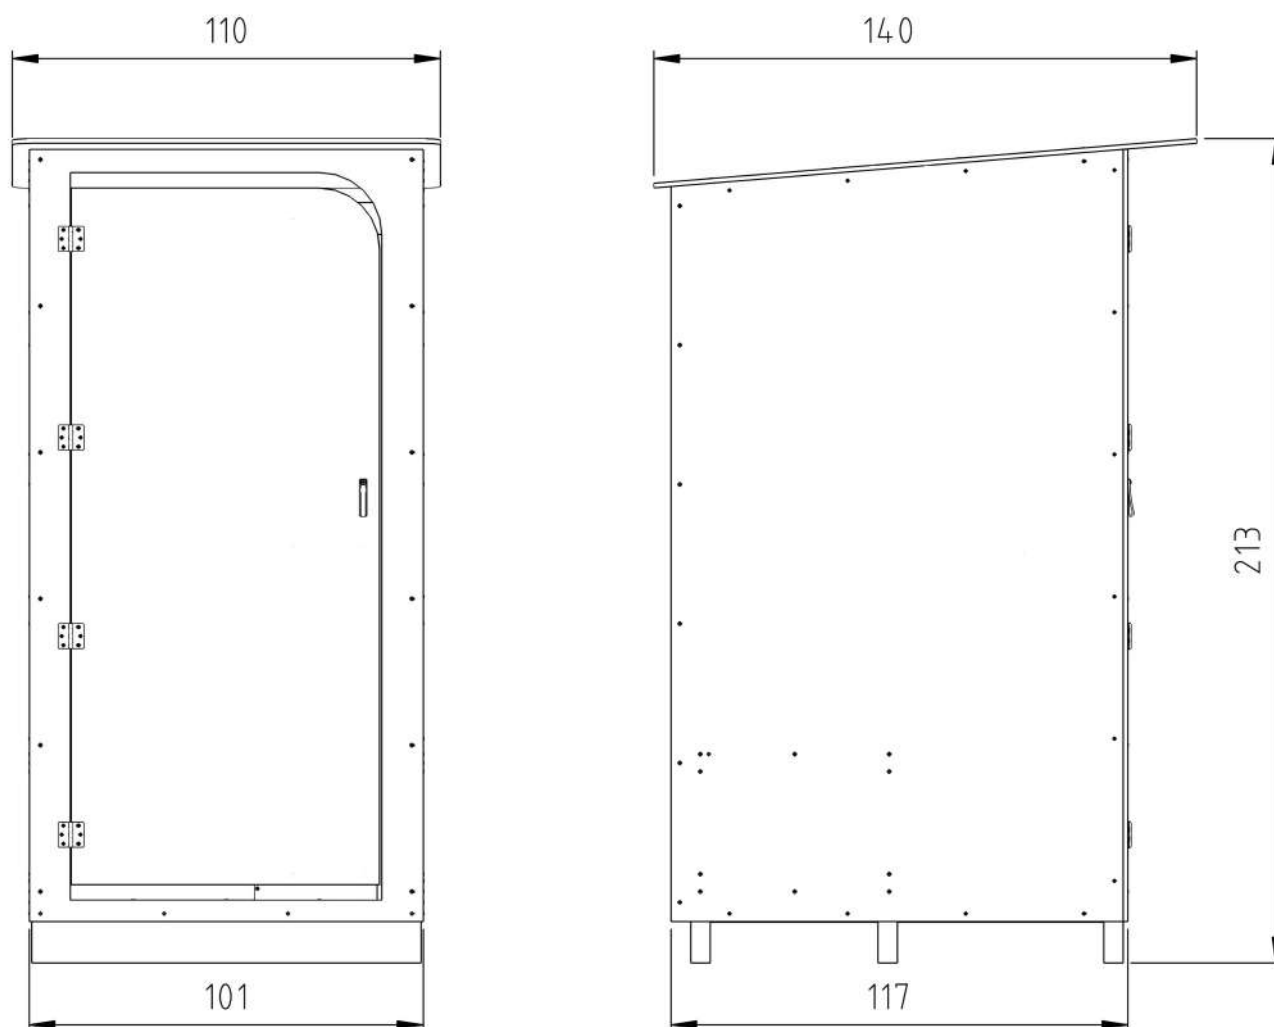

Our LoBu is super lightweight and can be quickly assembled by two people. When treated with glaze or varnish, it also becomes weather-resistant. No suction is required for emptying, and neither electricity nor a water connection is needed for use.

The cabin is wind- and weather-resistant, offering full comfort. A skylight provides sufficient daylight, and an optional battery-powered, motion-sensor interior light ensures illumination at night.

The materials used allow for easy cleaning, even with high-pressure or steam cleaners.

Data Sheet
